## DETAILED ACTION

### *Election/Restrictions*

Applicant's election without traverse of December 17, 2004 in the reply filed on group I, claims 1-15 is acknowledged.

### *Specification*

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: **extracellular** and **intracellular** semiconductor nanocrystal.

<sup>in clms 8 & 9</sup>

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 8 and 9 are indefinite for reciting an intracellular semiconductor nanocrystal and an extracellular semiconductor nanocrystal respectively. Because the specification fails to describe what an intracellular and extracellular semiconductor nanocrystal are, these claims are indefinite since these are not well-known in the art.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1641

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 4-7, 10-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Barbera-Guillem (US 6,194,213).

Barbera-Guillem teaches a human T lymphocyte cell labeled at the membrane with functionalized nanocrystals comprised CdSe/ZnS (core/shell) or multilabeled with nanocrystals and a fluorescent. The nanocrystals are semiconductor nanocrystals comprising a CdSe core and a ZnS shell and may further comprise a dopant (fluorescence property) such as rare earth metal or a transitional metal. (see col. 3, line 55-col.4, line 10; col. 5, line 38-col. 6, line 23; examples 2, 3).

Claims 1-3 6, 7, 10-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Bawendi et al. (US 6,306,610).

Bawendi teaches a composition comprising fluorescent semiconductor nanocrystals associated to a molecule such as cells, prokaryotic or eukaryotic. The semiconductor nanocrystals comprise a CdSe core and a ZnS shell. The composition is also associated with cell membranes. (see col. 3, line 60-col. 4, line 62; col. 19, lines 58-60; col. 20, lines 51-59; col. 29, lines 41-42).
